## Agile Planning Poker broken on Java 11

This page constitutes random notes from my work day as an Atlassian product consultant, put up in the vague hope they might benefit others. Expect rambling, reference to unsolved problems, and plenty of stacktraces. **Check the date** as any information given is likely to be stale.

Half of today was spent finding out why the Spartez Planning Poker for Jira plugin was broken on a recently upgraded Jira 8.5.1 system. Users are not able to join a session:

and atlassian-jira.log contains an interesting tracktrace:

```
2019-11-26 22:49:22,854 ajp-nio-127.0.0.100-8009-exec-1668 ERROR [o.a.c.c.C.[.[localhost].[/].[servlet-module-container-servlet]] Servlet.service() for servlet [servlet-module-container-servlet] in context with path [] threw exception
java.lang.NullPointerException
at org.atmosphere.cpr.AsynchronousProcessor.map(AsynchronousProcessor.java:397)
at org.atmosphere.cpr.AsynchronousProcessor.action(AsynchronousProcessor.java:185)
at org.atmosphere.cpr.AsynchronousProcessor.suspended(AsynchronousProcessor.java:114)
at org.atmosphere.container.Servlet30CometSupport.service(Servlet30CometSupport.java:67)
at org.atmosphere.cpr.AtmosphereFramework.doCometSupport(AtmosphereFramework.java:2300)

... 14 filtered
at com.atlassian.jira.security.JiraSecurityFilter.lambda$doFilter$0(JiraSecurityFilter.java:66)
```

When plugins break and I've no clue as to why, my general process is to copy the plugin jar locally, load the classes into a Java decompiler and hope something leaps out:

```
/usr/lib/jvm/java-1.8.0-openjdk-amd64/bin/java-cp/tmp/poker.jar-jar/opt/jd-gui/jd-gui.jar # Note: doesn't work with Java 11
```

```

                                                                       logger.debug("No AtmosphereHandler maps request for {} with mapping
         🔝 AtmosphereHandler.class
                                                             400
                                                                       throw new AtmosphereMappingException("No AtmosphereHandler maps re
           AtmosphereInterceptor.class
         🚮 AtmosphereInterceptorAdapter.class
                                                             403
                                                                     return atmosphereHandlerWrapper;
```

In this case, nothing leapt out.

So on to the tedious business of restoring a backup from a last-known-working time, which was before the 8.5.1 upgrade.

In summary, it's Java 11. The plugin isn't compatible. I file a bug with Spartez, and am told it's already known:

## Your request status changed to Waiting for Customer 12 hours ago

## Bruno Raymundo 12 hours ago

Hi, Jeff!

Thank you for all the details provided. We can confirm that this issue is caused by a known bug. The internal bug report was linked to this support ticket and you will be notified when there is an update.

In the meantime, let us know in case you have any additional questions or face any obstacles. We'll be glad to help!

Best regards,

Bruno Raymundo Spartez Software Support

**DETAILS** 13 hours ago

Give us more detail \*

Hi,

Jira 8.5 is (I think) the first release to support Java 11 (https://confluence.atlassian.com/adminjiraserver/supported-platforms-938846830.html).

Unfortunately it appears Agile Poker Enterprise for JIRA 5.4.9 is not Java 11 compatible. When I try to join a planning session, I just get an "You have been disconnected from the estimation session." error (see screenshot). The logs contain a stacktrace:

java.lang.NullPointerException

at org.atmosphere.cpr.AsynchronousProcessor.map(AsynchronousProcessor.java:397)

at org.atmosphere.cpr.AsynchronousProcessor.action(AsynchronousProcessor.java:185)

at org.atmosphere.cpr.AsynchronousProcessor.suspended(AsynchronousProcessor.java:114)

at org.atmosphere.container.Servlet30CometSupport.service(Servlet30CometSupport.java:67)

at org.atmosphere.cpr.AtmosphereFramework.doCometSupport(AtmosphereFramework.java:2300)

at com.spartez.pokerng.atmosphere.SpartezAtmosphereFilter.doFilter(SpartezAtmosphereFilter.java:109)

... 14 filtered

If I run Jira using Java 1.8, Planning Poker works.

I have attached logs from both Java 1.8 and Java 11 for comparison. I had enabled TRACE-level logging of the relevant packages in log4j.properties:

log4j.logger.org.atmosphere.cpr = TRACE, filelog

log4j.additivity.org.atmosphere.cpr = false

log4j.logger.com.spartez.pokerng = TRACE, filelog

log4j.additivity.org.atmosphere.cpr = true
log4j.logger.com.spartez.pokerng.atmosphere = TRACE, filelog
log4j.additivity.org.atmosphere.cpr = true

Which product is this for? \*
Agile Poker for Jira

How is your Jira hosted? \*
Self-hosted (Server or Data Center)

Grr! Why can't companies make their issue trackers public, like Atlassian and Adaptavist? Why does every customer need to re-discover problems and refile feature requests in 'Support' portals?
