

# Parsing JIRA JSON dates

The JSON from JIRA REST calls contains dates like:

```
"created": "2014-01-08T11:39:52.489+1100"
```

In Ruby this is parsed with:

```
DateTime.strptime('2014-01-08T11:39:52.489+1100', '%Y-%m-%dT%H:%M:%S.%L%z')  
=> #<DateTime: 2014-01-08T11:39:52+11:00 ((2456666j,2392s,489000000n),+39600s,2299161j)>
```
